

GlobalTech Launches AI-Powered Sustainability Dashboard

GlobalTech Corp unveiled its new *AI-Powered Sustainability Dashboard* on **March 12, 2026**, enabling enterprises to track carbon footprints in real time.

Key Features

- **Real-time analytics**
 - *Carbon intensity*
 - *CO₂e per unit*
- Predictive modeling
 - **Python** scripts for scenario analysis
- Integration with existing ERP systems

Technical Overview

```
import globaltech as gt
dashboard = gt.SustainabilityDashboard(api_key="YOUR_KEY")
dashboard.run()
```

User Benefits

1. Transparency

- Detailed metrics

“This tool gives us a clear view of our emissions.” — Jane Doe, 2026

2. Actionable Insights

“The dashboard transforms data into strategy.”
— John Smith, 2026

Adoption Metrics (Table)

Region	Users	Avg. Reduction
North America	120	12%

Europe	85	9%
--------	----	----

Next Steps

- Pilot program launch in Q2
- API expansion for third-party integrations

“We’re excited to see measurable impact.” — Emily Zhang, 2026
